

Dr. Séverin Lemaignan

A strategic vision towards Socially-Driven Autonomous Robots for Real-World HRI

SHORT BIO

- **2008–2012** Joint French (LAAS-CNRS) German (TU Munich) PhD
  - AI & Cognitive Robotics
  - Prix GdR Meilleure thèse
- **2013–2015** Post-doc at EPFL
  - Creation of an internationally recognised HRI team
- **2015-2018** Post-doc + lecturer at Plymouth University, UK
  - EU Marie Curie fellowship
  - Social Cognition in Robotics
- **2018–** Associate Prof. at Bristol Robotics Lab

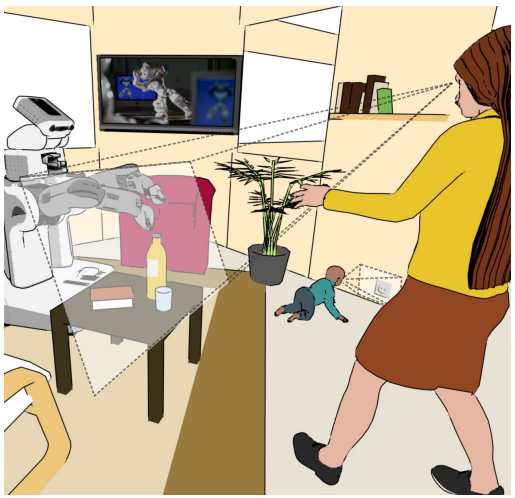
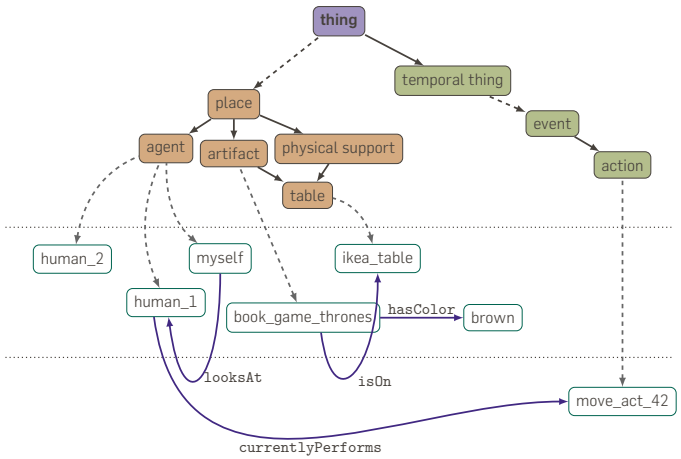
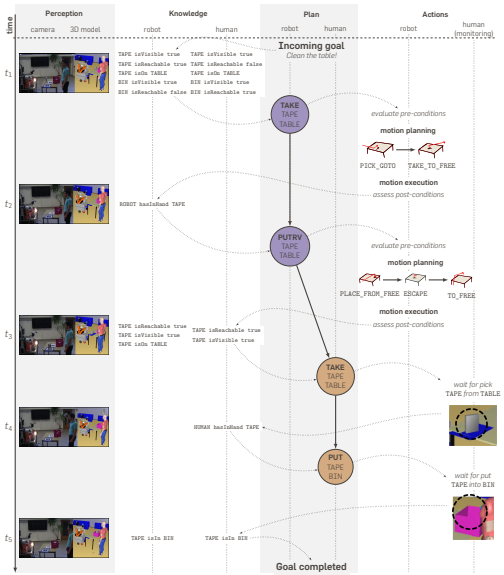
SYMBOLIC SOCIAL COGNITION FOR REAL-WORLD AUTONOMY



- real-time situation assessment
- geometric reasoning
- perspective-taking



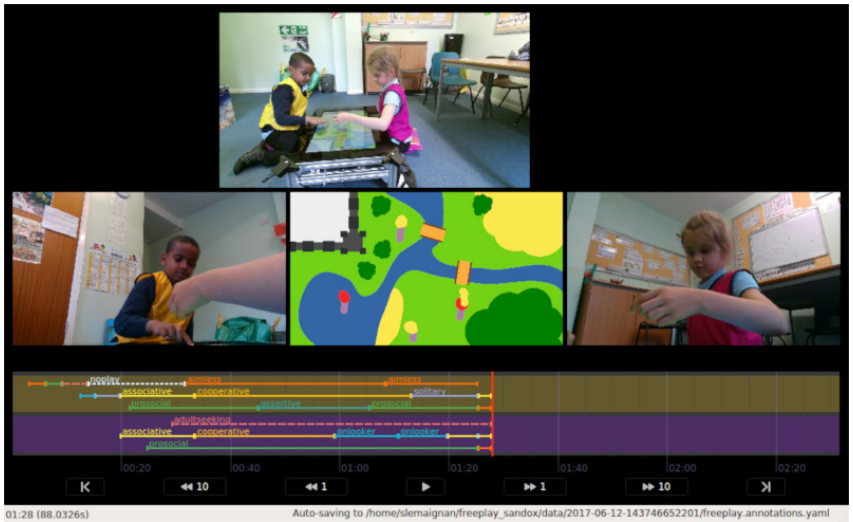
- ontologies
- real-time symbolic reasoning
- theory of mind

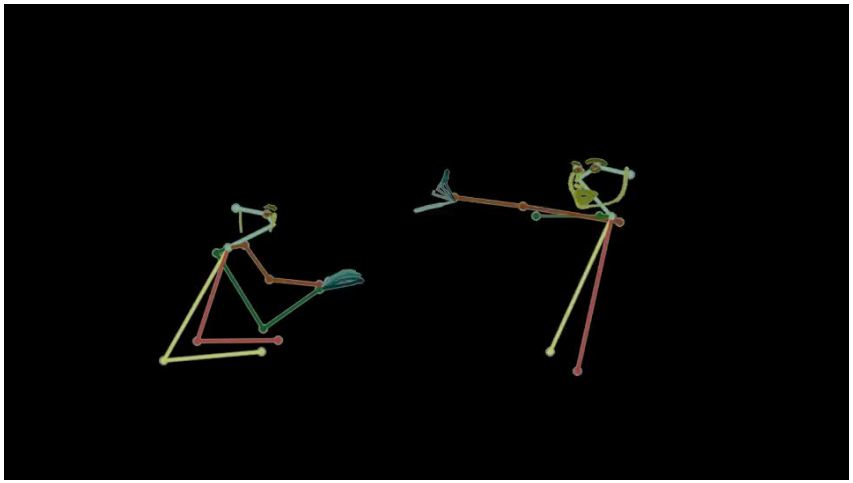


- Complete cognitive architecture
- Autonomy in semantic-rich social environments

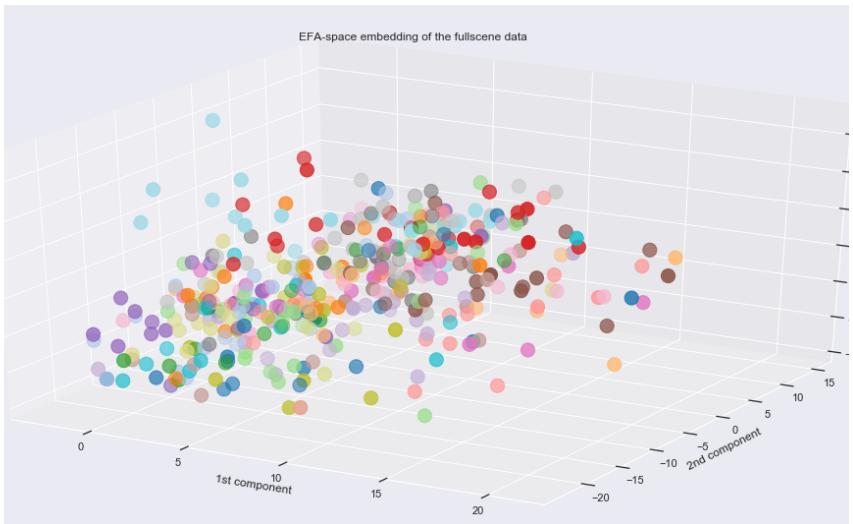
[Lemaignan et al. **Grounding the Interaction: Anchoring Situated Discourse in Everyday [...]** Intl. Journal of Social Rob. 2011],
[Lemaignan et al. **Artificial Cognition for Social Human-Robot Interaction: An Implementation** Artificial Intelligence 2017]

DATA-DRIVEN HRI — dataset of natural interactions



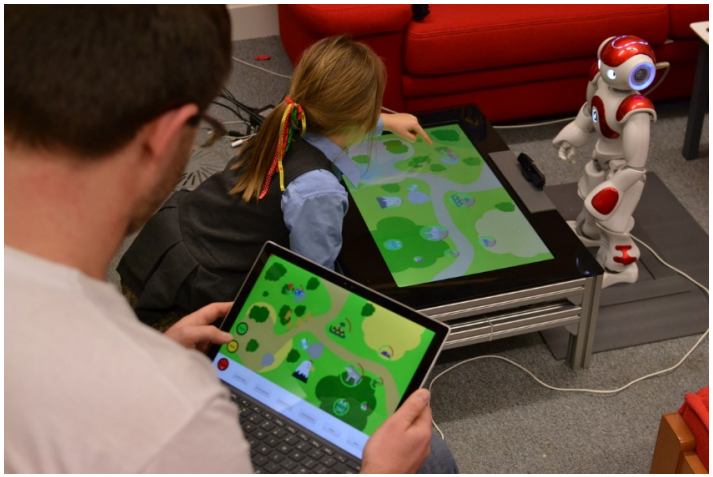


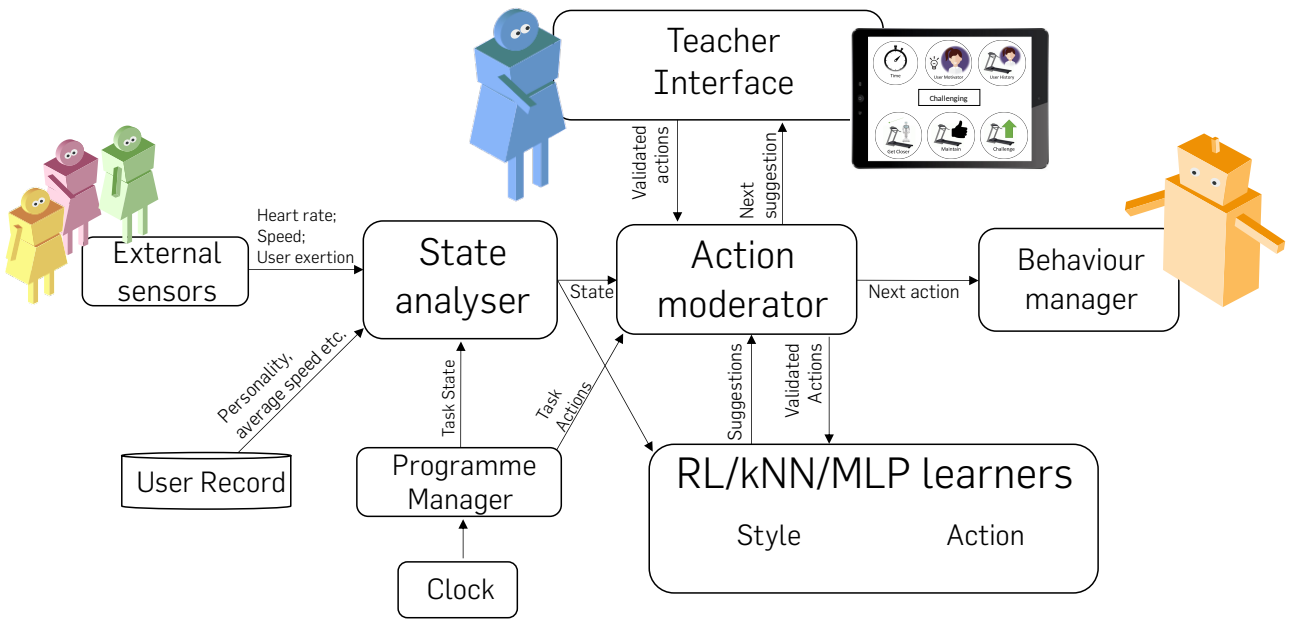
- PInSoRo dataset: 45h+ and 2M frames of annotated natural interactions
- new data analysis techniques to estimate internal state from body language
- first-in-kind dataset for data-driven study of social interactions in robotics



[Lemaignan et al. **The PInSoRo dataset: Supporting the data-driven study of child-child and child-robot [...]** PLOS One 2018]
[Bartlett et al. **What Can You See? Identifying Cues on Internal States from the Kinematics [...]** FrontiersIn 2019]

DATA-DRIVEN HRI — expert-in-the-loop machine learning



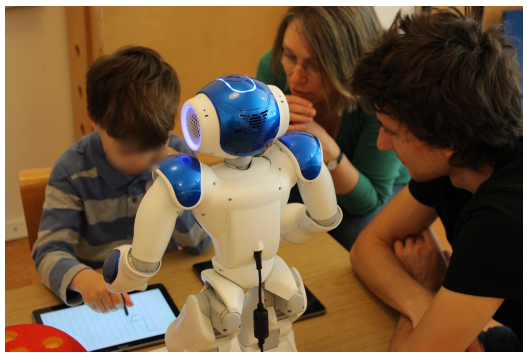


[Senft et al. **Teaching robots social autonomy from in situ human guidance** Science Robotics 2019]
[Winkle et al. **In-Situ Learning from a Domain Expert for Real World Socially Assistive Robot Deployment** RSS 2020]

HUMAN FACTORS — experimental work

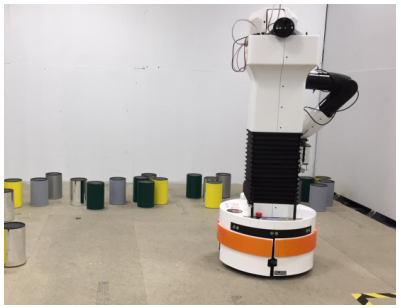
Extensive experimental work:

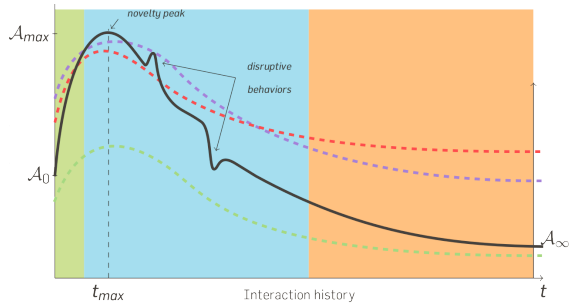
- over 25 field experiments over the past 10 years
- mixed methods; focus on real-world experiments (eg schools, gyms)
- child-robot interaction expertise: worked with 200+ children



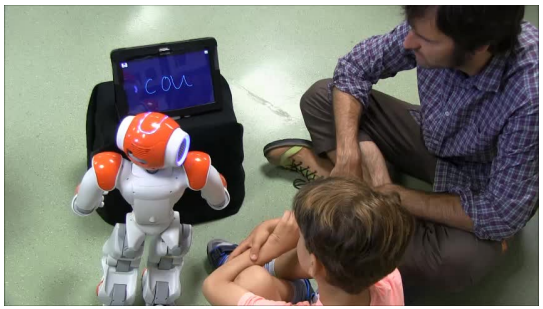
HUMAN FACTORS — expertise

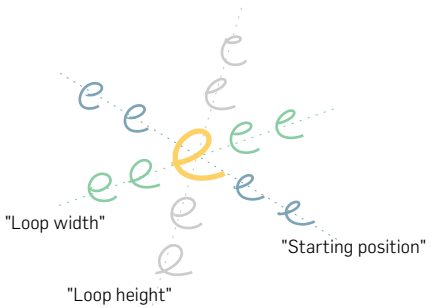
Understanding interaction

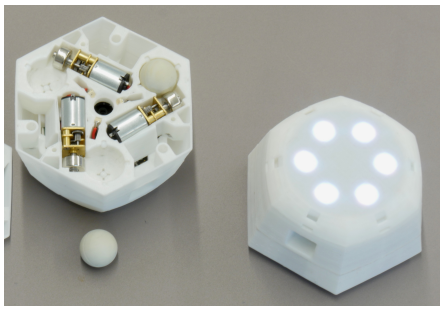




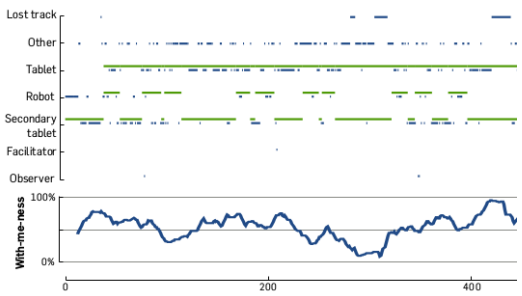
Robots for Learning

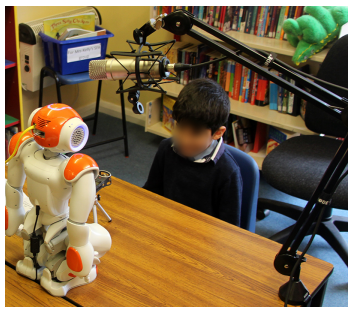


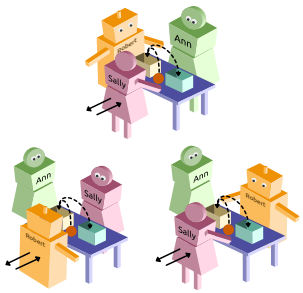




Methodology







SCIENTIFIC IMPACT

Contributions to basic research, experimental methodology and technology:

1. **ontologies** for robot knowledge modeling and symbolic reasoning
2. **perspective taking** and **theory of mind**: generate and maintain symbolic knowledge models for all the agents
3. framing & implementing **cognitive architecture for social interaction**
4. leading role in **shaping the emergent field of data-driven HRI**: **large datasets**; transdisciplinary **data-driven behaviour analysis**
5. major advances towards **learning autonomous social policies** for service robots
6. transdisciplinary expertise; number of **cross-disciplinary experimental work** and literature surveys;
7. **Child-robot interaction** expert in Europe

- **75+ publications** (2800+ citations, h-index=26 on Google Scholar), incl. *Artificial Intelligence*, *Science Robotics*
- Prix GdR Meilleure thèse
- Best Paper awards at RoMan, HRI
- major contributions to open-source robotics (core ROS dev); 150+ GitHub repos

MANAGEMENT OF RESEARCH

- **Associate professor in AI and Social Robotics**
- **Supervising 2 groups** at BRL (embodied cognition and autonomous vehicles), ≈**15 researchers**
- Responsible for **defining and implementing their research strategy**
- Currently managing >**€1M funding**
- Previously **established and led cHRI group at EPFL**; now internationally recognised
- Supervised or co-supervised **10 PhDs** to date
- **10+ years of teaching experience**; currently teaching HRI at Master level

IMPACT IN THE SCIENTIFIC COMMUNITY

Editorial activities

- Currently **Programme committee/editorial board** of FrontiersIn Robotics and AI; HRI; RSS; IROS; IJCAI
- **Organisation committee** of ACM/IEEE HRI since 2016

Bids and grants:

- PI or Co-I on **19 grant submissions** since 2013, incl. 4 EU ICT bids; 1 EU FET bids; **5 successful to date**
- **EU H2020 Marie-Curie fellowship** on Theory of Mind in 2015
- First **ERC Consolidator submission** in 2019

IMPACT ON THE BROADER SOCIETY

Policy making:

- **Invited expert to EU** on child-robot interaction
- **Scientific advisor for UNICEF** on ethics of cHRI

Technology transfer:

- **Scientific expert** for EU TERRINET, EU SABRE and 3 UK-based industry-led projects
- **Scientific advisor** for start-up KickSum Ltd
- US **patent** US20190016213A1 on haptic locomotion

Public engagement:

- Cluster **lead for outreach** at UWE
- Significant **media engagement** (TV, radio, press; eg CoWriter, Couck25K projects)
- Scientific engagement with public institutions, eg **London Science Museum**

RESEARCH PROJECT: SOCIAL ROBOTICS

Creating interactive robots that are **embedded and understand their (human) social context**; **generate and adopt appropriate social behaviours**; have a **positive impact on human society**.

⇒ designing and implementing the **assistant and companion robots** for tomorrow. Direct impact on ageing society, education, customer service.

Major socio-economic challenge + **European priority** ⇒ need to **develop capacity** and assert **leadership**

RESEARCH PROJECT: SOCIAL ROBOTICS

Major scientific challenges:

- Understand and sustain long-term autonomous social interactions;
- Real-world algorithmic robustness;
- Complex ethical landscape;
- $\Rightarrow$ cross-disciplinary & holistic approach required

RESEARCH PROJECT: SOCIAL ROBOTICS

Major scientific challenges:

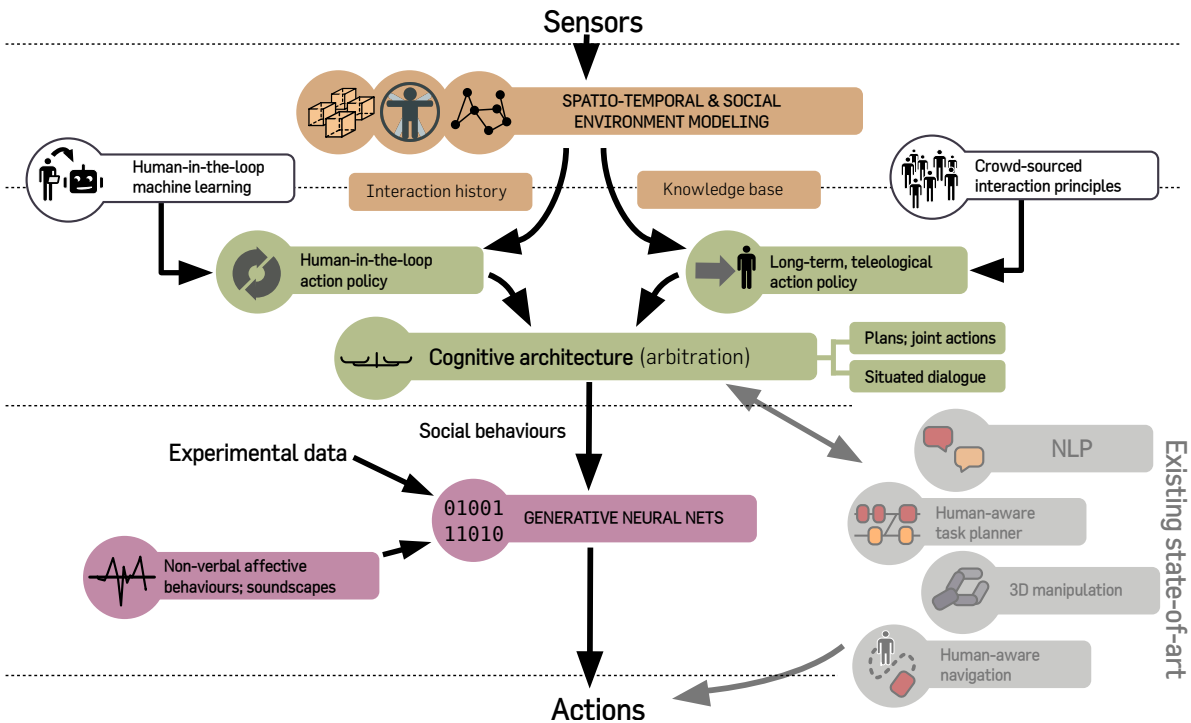
- Understand and sustain long-term autonomous social interactions;
- Real-world algorithmic robustness;
- Complex ethical landscape;
- $\Rightarrow$ cross-disciplinary & holistic approach required

My research proposal:

Socially-Driven Autonomous Robots for Real-world Human-Robot Interactions

KEY SCIENTIFIC AIMS

1. beyond state-of-art **robust real-world social modelling**; **social embeddings**
2. **public-in-the-loop** approach to design of **intrinsic social motivation**
3. **generative social behaviours** for robots
4. **cognitive architecture** for **long-term interaction**



MIXED METHODS

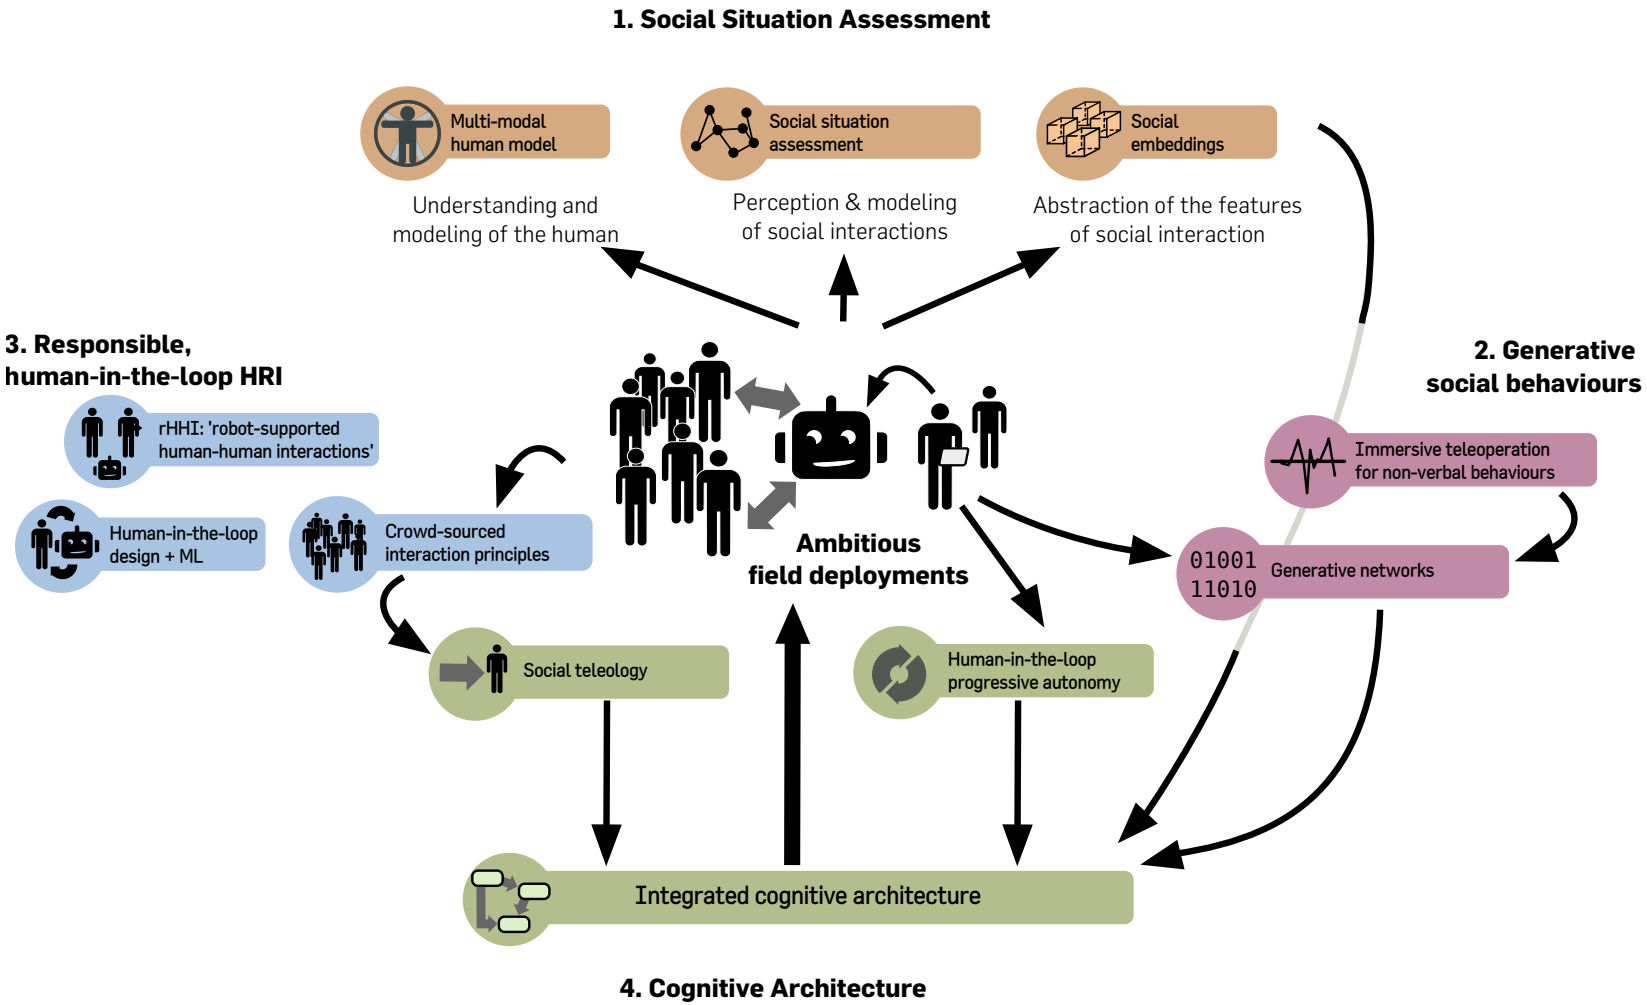
Standard methods:

- Exploratory field work/case studies
- Participatory design; co-design
- Ecologically-valid controlled studies
- Longitudinal studies
- Large-scale online crowd-sourcing

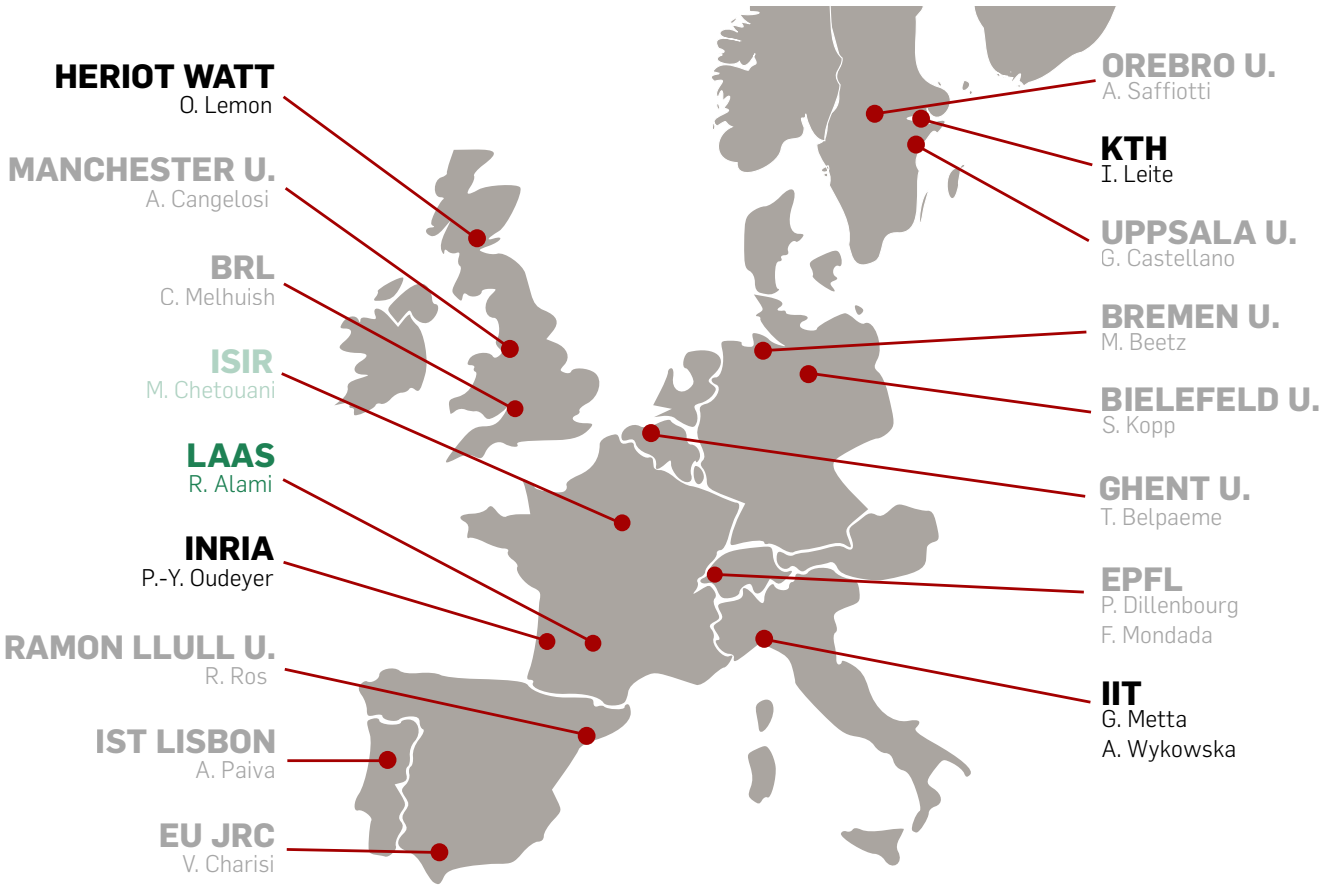
Novel methods that I introduce in my project:

- **Public-in-the-loop machine learning**
- **Immersive teleoperation and generative behaviours** with artists

4 AXES TO SCAFFOLD AN AMBITIOUS RESEARCH GROUP



2022: EU ICT BID: Socially-Driven Autonomous Robots



INTEGRATION LAAS

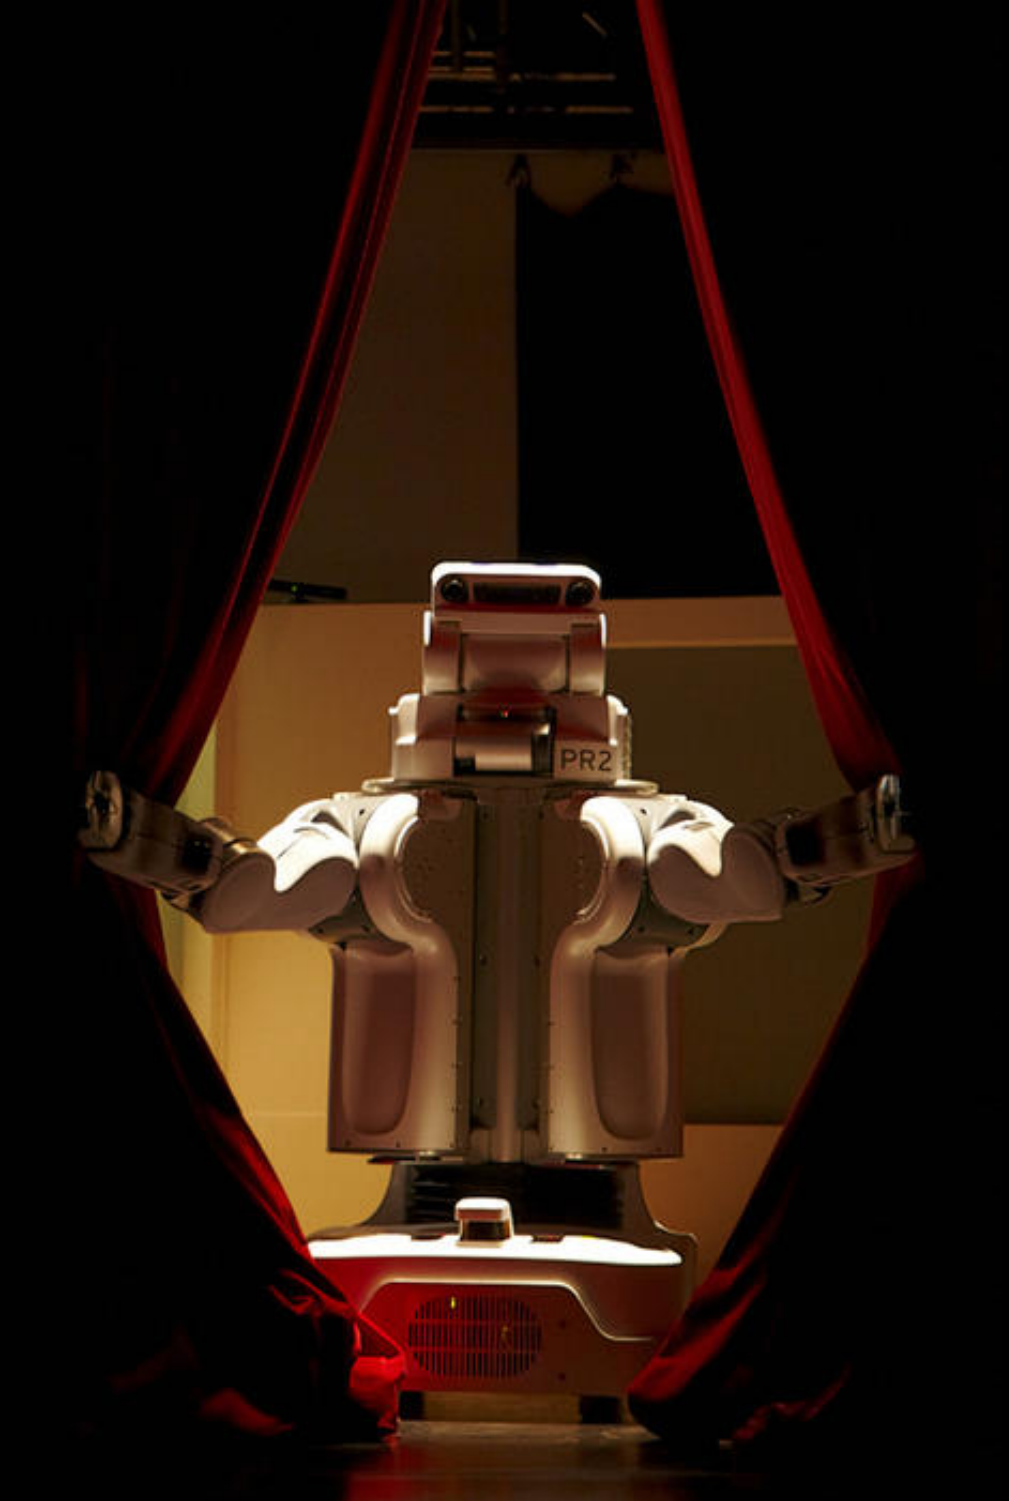
- Long-standing expertise in autonomous social robots (R. Alami) $\rightarrow$ natural integration to RIS team
- Excellent infrastructure & access to robots
- Software engineering expertise almost unique in academia
- ANITI: Excellent academic environment & collaboration opportunities

INTEGRATION LAAS

- Long-standing expertise in autonomous social robots (R. Alami) → natural integration to RIS team
- Excellent infrastructure & access to robots
- Software engineering expertise almost unique in academia
- ANITI: Excellent academic environment & collaboration opportunities

What I would bring:

- Experimental know-how with extensive expertise in real-world deployments
- Emerging theme: Data-driven HRI
- ANITI: transverse applications for AI and robotics



Thank you!
